Undercarriage	Excellent
Hydraulic Pumps	Excellent
Structural Booms	Excellent

INSPECTION NOTES

This 2024 Komatsu WA600-8 is a proven wheel loader with 1,600 engine hours, configured for hard-rock mining and quarry extraction. Power is delivered by a Komatsu SAA6D170E-7 6-cylinder turbocharged diesel, and the unit is serviced 320 hours ago and comfortably within its scheduled maintenance window. All five major components — undercarriage, track links, hydraulic pumps, structural boom, and engine — have been assessed as good to excellent condition throughout. Operating weight is approximately 52,152 kg. Currently held at our yard in São Paulo, Brazil, the machine has cleared our full 150-point yard inspection protocol and is available for immediate export on order confirmation.

This inspection report documents the physical condition of the listed equipment as assessed by BlueRock Equipment's yard inspection team. All component ratings reflect visual inspection and operational testing completed on the inspection date above. This report is valid for 90 days.
