Structural Booms	Excellent

INSPECTION NOTES

This 2024 JCB 3CX is a proven wheel loader with 1,050 engine hours, configured for general civil and construction applications. Power is delivered by a JCB Ecomax T4 Final 4-cylinder turbocharged diesel, and the unit is recently serviced — maintenance completed 210 hours ago with full fluid change and filter replacement. All five major components — undercarriage, track links, hydraulic pumps, structural boom, and engine — have been assessed as good to excellent condition throughout. Operating weight is approximately 8,645 kg. Currently held at our yard in Cork, Ireland, the machine has cleared our full 150-point yard inspection protocol and is available for immediate export on order confirmation.

This inspection report documents the physical condition of the listed equipment as assessed by BlueRock Equipment's yard inspection team. All component ratings reflect visual inspection and operational testing completed on the inspection date above. This report is valid for 90 days.
